## Safety Precautions

### Refer to *Warranty and Limitations of Liability*.

#### WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

#### Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

- The paper bag sensors are used to detect whether paper bags contain contents inside. Note, however, that the sensors are not available for some types of paper bags.

- About the lens The inside of the emitter lens looks cloudy. This is due to the characteristics of the lens and not abnormal. Use it as it is.

Inside paper bag	Type of paper bag	Remarks
Detectable	Light colored paper bags	Empty paper bags allow beam-through while paper bags containing liquid or solid objects do not. Detection uses this difference.
Not detectable	Dark colored paper bags, Paper bags having inner coating of aluminum foil	Paper bags prevent beam-through. Detection cannot be made.

Note: Make sure in which of the types your paper bag is categorized before use.
