The Best PT for Package PLCs —「NV」

The NV Series of compact Programmable Terminals meet the basic needs for enhanced visibility, simplicity, and cost, and they go even further to provide superior PLC compatibility, easy operation, and cost performance.

“V” stands for the three benefits

- Value** Easy design work and superior PLC compatibility
- Visibility** Beautiful, easy-to-understand displays
- Variation** A lineup of ten 3-inch models for easy selection

Visibility Beautiful, Easy-to-understand Displays

Instantly know the system status
It is obvious in three color LED backlight

The monochrome models provide three backlight colors to perform status displays. For example, use green for normal operation, orange for user controls, and red for errors so that the operating status can be seen at a glance.

■ NV□W-MG

Normal Operation	User Controls	Error Displays
Green	Orange	Red

The red backlight makes error displays bright and easy to see.

■ NV□W-MR / NV3Q-MR

Normal Operation	User Controls	Error Displays
White	Pink	Red

Value Easy Designing

The slim design of NV-series PTs requires very little installation space.

Vertical Installation

The PT can be installed vertically to enable more applications. This enables more flexible designs.

Global Application
Multi-language Support and Safety Standard Compliance

You can switch parts labels and languages. Record up to sixteen character strings in different languages and change all labels at the same time. Switching the language during operation is also very easy. International safety standards have also been met so that you can easily export equipment or transport equipment overseas.
