

PROGRAMMABLE CONTROLLERS
MELSEC-F

FX-30P

INSTALLATION MANUAL

| | |
|---------------|-------------|
| Manual Number | JY997D34201 |
| Revision | F |
| Date | April 2015 |

This manual describes the part names, dimensions, and specifications of the product. Before use, read this manual and manuals of relevant products fully to acquire proficiency in handling and operating the product. Make sure to learn all the product information, safety information, and precautions. And, store this manual in a safe place so that you can take it out and read it whenever necessary. Always forward it to the end user.

Registration:
The company name and the product name to be described in this manual are the registered trademarks or trademarks of each company.

Effective April 2015
Specifications are subject to change without notice.
© 2008 Mitsubishi Electric Corporation

Safety Precautions (Read these precautions before use.)

This manual classifies the safety precautions into two categories:

WARNING and **CAUTION**

| | |
|----------------|---|
| WARNING | Indicates that incorrect handling may cause hazardous conditions, resulting in death or severe injury. |
| CAUTION | Indicates that incorrect handling may cause hazardous conditions, resulting in medium or slight personal injury or physical damage. |

Depending on circumstances, procedures indicated by **CAUTION** may also cause severe injury. It is important to follow all precautions for personal safety.

How to obtain manuals

For product manuals or documents, contact the Mitsubishi Electric dealer from whom you purchased your product.

Certification of UL, cUL standards

FX-30P units comply with the UL standards (UL, cUL).
UL, cUL File Number: E95239

Regarding the standards that comply with the main unit, please refer to either the FX series product catalog or consult with your nearest Mitsubishi product provider.

Compliance with EC directive (CE Marking)

This note does not guarantee that an entire mechanical module produced in accordance with the contents of this note will comply with the following standards. Compliance to EMC directive and LVD directive for the entire mechanical module should be checked by the user/manufacturer. For more information please consult with your nearest Mitsubishi product provider.

Regarding the standards that comply with the main unit, please refer to either the FX series product catalog or consult with your nearest Mitsubishi product provider.

Requirement for Compliance with EMC directive

The following products have shown compliance through direct testing (of the identified standards below) and design analysis (through the creation of a technical construction file) to the European Directive for Electromagnetic Compatibility (2004/108/EC) when used as directed by the appropriate documentation.

Attention

- This product is designed for use in industrial applications.

Note

- Authorized Representative in the European Community: Mitsubishi Electric Europe B.V. Gothaer Str. 8, 40880 Ratingen, Germany

Type: Programmable Controller (Open Type Equipment)
Models: MELSEC FX series manufactured from December 1st, 2008
FX-30P

| Standard | Remark |
|--|---|
| EN61131-2:2007 Programmable controllers - Equipment requirements and tests | Compliance with all relevant aspects of the standard. EMI • Radiated Emission • Conducted Emission EMS • Radiated electromagnetic field • Fast transient burst • Electrostatic discharge • High-energy surge • Voltage drops and interruptions • Conducted RF • Power frequency magnetic field |

Caution for EC Directive

Attach the ferrite core to the communication cables (PLC side). Attach the ferrite core in approximately 100mm(3.93") or less from connector on the PLC side.
For the ferrite core use the following product or one with equivalent specifications. Model name:ZCAT2035-0930 (Manufactured by TDK co., Ltd.)

1. Introduction

Mitsubishi Handy Programming Panel FX-30P (hereafter abbreviated as "FX-30P") is a handheld unit to edit programs, monitor and test devices, etc. for a connected FX Series PLC.

→ For system configuration, refer to the FX-30P Operation Manual.

1.1 Major Features of the FX-30P

- The FX-30P is a compact, handheld program monitor.
- The FX-30P displays the program/PLC operation status (monitor), operation guidance and error messages on the LC display of 21 half-width characters by 8 lines.
- The FX-30P offers online mode and offline mode. The FX-30P directly accesses the memory of the connected PLC in online mode, and accesses the built-in RAM in offline mode.
- The FX-30P can back up programs written in offline mode using the built-in battery.
- The FX-30P has a built-in flash memory to save up to 15 programs. The program management function can read out programs saved in the flash memory to the built-in RAM, write programs from the built-in RAM to the flash memory, and delete programs.
- The FX-30P offers list format for writing and reading programs and displaying monitored devices.

1.2 Incorporated Items

Check to ensure the following product and items are included in the package:

| Included Items | |
|---|---------------|
| FX-30P | 1 unit |
| FX-20P-CAB0 (cable) | 1 cable |
| Manuals [Japanese version, English version] | 1 manual each |

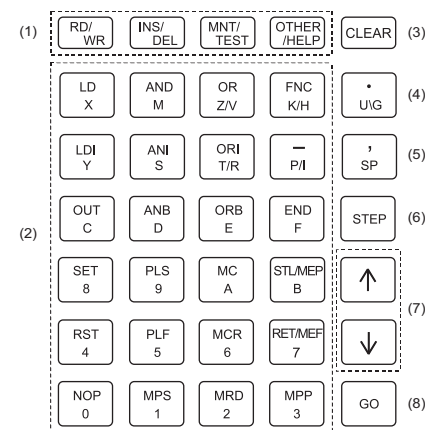

1.3 External Dimensions and Part Names

Unit: mm(inches)
MASS(Weight): 0.3kg(0.66lbs)

- LCD display (With backlight)
- PLC communication port
- USB cover
- USB communication port
- Slide hook
- Battery cover
- Screw for battery cover anchoring
- FX3U-32BL type battery (standard accessory)
- Key

1.4 Key layout

- Function keys (read/write, insert/delete, monitor/test and other/help): Each key operates alternately.
- Instruction keys, device symbol keys and numeric keys: Instruction keys are provided in the upper position of each key, and numeric and device number keys are provided in the lower position of each key.
- [Clear] key: Use this key to cancel the key input before pressing the [GO] key (before confirmation), clear an error message, or return to the previous screen.
- This key is provided to aid device symbol input. Use this key to directly specify a buffer memory or specify a device bit.
- [Space] key: Use this key to enter space in the entry column, specify a device or specify a constant.
- [Step] key: Use this key to specify the step number.
- Cursor control keys: Use these keys to move the line cursor and prompt, specify a device before or after the currently specified device, or scroll lines. Press and hold a cursor control key for 1 second or more to achieve continuous input.
- [GO] key: Use this key to confirm or execute a command, scroll the screen after display, or perform a search again.

2. Installation

| INSTALLATION PRECAUTIONS |  CAUTION |
|--|--|
| <ul style="list-style-type: none"> Use the product within the generic environment specifications described in section 3.2 of this manual. Never use the product in areas with excessive dust, oily smoke, conductive dusts, corrosive gas (salt air, Cl₂, H₂S, SO₂, or NO₂), flammable gas, vibration or impacts, or expose it to high temperature, condensation, or rain and wind. If the product is used in such conditions, electric shock, fire, malfunctions, deterioration or damage may occur. Do not touch the conductive parts of the product directly. Doing so may cause device failures or malfunctions. Connect cables securely to their designated connectors. Loose connections may cause malfunctions. Do not connect a PLC and a personal computer at the same time to the FX-30P. Failure to do so may cause equipment failures or malfunctions. | |

For details on the installation, refer to the following manual.

→ Refer to the FX-30P Operation Manual.

2.1 Connection to a PLC

The FX-30P can be connected to the programming port of the main unit. Refer to the manual of the connected PLC and the FX-30P Operation Manual for details.

2.2 Connection to a personal computer

The FX-30P can be connected to the USB port of the personal computer.

For details, refer to the FX-30P Operation Manual.

3. Specification

For details on specifications, refer to the following manual.

→ Refer to the FX-30P Operation Manual.

| DESIGN PRECAUTIONS |  CAUTION |
|---|---|
| <ul style="list-style-type: none"> When executing control (data changes) to an operating PLC, construct an interlock circuit in the sequence program so that the entire system operates conservatively. Additionally, when executing control such as program changes and operation status changes (status control) to an operating PLC, thoroughly read the manual and sufficiently confirm safety in advance. Make sure to have the following safety circuits outside the PLC to ensure safe system operation even during external power supply problems or PLC failure. Otherwise, malfunctions may cause serious accidents. <ol style="list-style-type: none"> Most importantly, have the following: an emergency stop circuit, a protection circuit, an interlock circuit for opposite movements (such as normal vs. reverse rotation), and an interlock circuit (to prevent damage to the equipment at the upper and lower positioning limits). Note that when the PLC CPU detects an error, such as a watchdog timer error, during self-diagnosis, all outputs are turned off. Also, when an error that cannot be detected by the PLC CPU occurs in an input/output control block, output control may be disabled. External circuits and mechanisms should be designed to ensure safe machinery operation in such cases. | |

| DESIGN PRECAUTIONS |  CAUTION |
|--|---|
| <ul style="list-style-type: none"> Observe the following items. Failure to do so may cause incorrect data-writing through noise to the PLC and result in PLC failure, machine damage or other accidents. <ol style="list-style-type: none"> Do not bundle the control line together with or lay it close to the main circuit or power line. As a guideline, lay the control line at least 100mm (3.94") or more away from the main circuit or power line. Noise may cause malfunctions. Ground the shield wire or shield of a shielded cable. Do not use common grounding with heavy electrical systems. Install module so that excessive force will not be applied to the power connector. Failure to do so may result in wire damage/breakage or PLC failure. | |

| STARTUP AND MAINTENANCE PRECAUTIONS |  CAUTION |
|---|---|
| <ul style="list-style-type: none"> Turn off the power to the PLC before attaching or detaching the battery. Doing so may cause equipment failures, or malfunctions. Use the battery for memory backup correctly in conformance to the manual of each product. <ul style="list-style-type: none"> Use the battery only for the specified purpose. Connect the battery correctly. Do not charge, disassemble, heat, put in fire, short-circuit, connect reversely, weld, swallow or burn the battery, or apply excessive forces (vibration, impact, drop, etc.) to the battery. Do not store or use the battery at high temperatures or expose to direct sunlight. Do not expose to water, bring near fire or touch liquid leakage or other contents directly. Incorrect handling of the battery may cause heat excessive generation, bursting, ignition, liquid leakage or deformation, and lead to injury, fire or failures and malfunctions of facilities and other equipment. Before modifying or disrupting the program in operation or running the PLC, carefully read through this manual and the associated manuals and ensure the safety of the operation. An operation error may damage the machinery or cause accidents. Do not change the program in the PLC from two or more peripheral equipment devices at the same time. (i.e. from a programming tool and a GOT) Doing so may cause malfunction of the PLC program. | |

| STARTUP AND MAINTENANCE PRECAUTIONS |  CAUTION |
|--|---|
| <ul style="list-style-type: none"> Do not disassemble or modify the PLC. Doing so may cause fire, equipment failures, or malfunctions. For repair, contact your local Mitsubishi Electric representative. Turn off the power to the PLC before connecting or disconnecting cable. Failure to do so may cause equipment failures or malfunctions. | |

| DISPOSAL PRECAUTIONS |  CAUTION |
|--|---|
| <ul style="list-style-type: none"> Please contact a certified electronic waste disposal company for the environmentally safe recycling and disposal of your device. When disposing of batteries, separate them from other waste according to local regulations. (For details of the Battery Directive in EU countries, refer to FX-30P Operation Manual.) | |

| TRANSPORTATION AND STORAGE PRECAUTIONS |  CAUTION |
|---|---|
| <ul style="list-style-type: none"> The FX-30P is a precision instrument. During transportation, avoid impacts larger than those specified in the general specifications (refer to Section 3.2) of this manual. Failure to do so may cause failures in the FX-30P. After transportation, verify the operations of the FX-30P. Before transporting the FX-30P, make sure to turn on the power of the FX-30P, and confirm that an HPP battery voltage low error does not occur (or confirm that the HPP battery voltage is 2.7 V or more). If the FX-30P is transported when the battery voltage is low and the battery life is expired, the battery-backed data may not be held correctly during transportation. When transporting lithium batteries, follow required transportation regulations. (For details of the regulated products, refer to FX-30P Operation Manual.) | |

3.1 Applicable PLC

| Model name |
|--|
| FX1/FX2(FX)/FX2C/FX0/FX0S/FX0N/FX1S/FX1N/FX1NC/FX2N/FX2NC/FX3S/FX3G/FX3GC/FX3U/FX3UC Series PLC ¹ |

¹ An FX-20P-CAB is necessary to connect the FX-30P with the FX1/FX2(FX)/FX2C PLC.

3.2 General Specifications

| Item | Specification | | | |
|------------------------------------|--|----------------------------------|---------------------|--|
| Ambient temperature | 0 to 40°C (32 to 104°F) | | | |
| Ambient humidity | 5 to 95%RH (no condensation) when operating | | | |
| Storage ambient temperature | -25 to 75°C (-13 to 167°F) | | | |
| Storage ambient humidity | 5 to 95%RH (no condensation) | | | |
| Vibration resistance ^{*1} | Frequency (Hz) | Acceleration (m/s ²) | Half amplitude (mm) | Sweep Count for X, Y, Z: 10 times (80 min in each direction) |
| | 5 to 9 | - | 3.5 | |
| | 9 to 150 | 9.8 | - | |
| Shock resistance ^{*1} | 147m/s ² Acceleration, Action time: 11ms, 3 times by half-sine pulse in each direction X, Y, and Z | | | |
| Noise resistance | By noise simulator at noise voltage of 1,000Vp-p, noise width of 1ms, rise time of 1ns and period of 30 to 100Hz | | | |
| Working atmosphere | Free from corrosive or flammable gas and excessive conductive dust | | | |
| Working altitude | <2000m ^{*2} | | | |

^{*1} The criterion is shown in IEC61131-2.

^{*2} The PLC cannot be used at a pressure higher than the atmospheric pressure to avoid damage.

3.3 Power Supply Specification

| Item | | Specification | |
|-----------------------|----------------------|--|--|
| External power supply | Power supply voltage | 5V DC ±5% (Power supply is supplied from PLC or personal computer. ^{*1}) | |
| | Current consumption | supplied from PLC | 155mA (When the intensity of LCD backlight is set at the maximum value 8) 115mA (When the intensity of LCD backlight is set at the initial value 4) |
| | | supplied from personal computer. | 165mA (When the intensity of LCD backlight is set at the maximum value 8) 125mA (When the intensity of LCD backlight is set at the initial value 4) |

^{*1} Power supply by bus power

3.4 Performance Specification

| Item | Specification | |
|---------------------|--|---|
| Display unit | Type | STN monochrome (white/black) liquid crystal |
| | Resolution | 128x64 dots |
| | Display size | W66.54(2.62) x H33.26(1.31)[mm](inch) |
| | Foreground color | Monochrome (white/black) |
| Backlight | White | |
| Buzzer | 9-level adjustment (including the buzzer OFF level) | |
| Contrast adjustment | 8-level adjustment | |
| Intensity of LCD | 9-level adjustment (including the backlight OFF level) | |
| Key figure | 35 pieces | |
| Memory | Program capacity | Built-in RAM: 64K step RAM retention (for about five years, ambient temperature 25°C(77°F)) by battery. |
| | FX-30P held data | Built-in flash memory: Up to 15 programs can be stored in the built-in flash memory. Allowable number of writes: 100000 times |
| | FX-30P held data | Language display setting (Japanese/English/Chinese), contrast, buzzer volume, intensity control, screen save, HPP protect key (saved in the flash memory) |

3.5 Communication specification

| Item | | Specification |
|-------------------------------------|-------------------------------|---|
| For PLC communication | Communications standard | Serial RS-422 standard practice compliant 1ch |
| | Transmission speed | 115.2/57.6/38.4/19.2/9.6kbps |
| | Connector shape configuration | RS-422 mini DIN 8 pin female |
| For personal computer communication | Communications standard | USB 2.0/1.1 standard practice compliant 1ch |
| | Transmission speed | 115.2kbps after serial conversion. |
| | Connector shape configuration | USB mini B plug female |

This manual confers no industrial property rights or any rights of any other kind, nor does it confer any patent licenses. Mitsubishi Electric Corporation cannot be held responsible for any problems involving industrial property rights which may occur as a result of using the contents noted in this manual.

Warranty

Mitsubishi will not be held liable for damage caused by factors found not to be the cause of Mitsubishi; opportunity loss or lost profits caused by faults in the Mitsubishi products; damage, secondary damage, accident compensation caused by special factors unpredictable by Mitsubishi; damages to products other than Mitsubishi products; and to other duties.

|  For safe use |
|---|
| <ul style="list-style-type: none"> This product has been manufactured as a general-purpose part for general industries, and has not been designed or manufactured to be incorporated in a device or system used in purposes related to human life. Before using the product for special purposes such as nuclear power, electric power, aerospace, medicine or passenger movement vehicles, consult with Mitsubishi Electric. This product has been manufactured under strict quality control. However when installing the product where major accidents or losses could occur if the product fails, install appropriate backup or failsafe functions in the system. |
